Informatics Management student at Politeknik Praktisi Bandung (5th semester, expected graduation 2027) with hands-on experience as a Fullstack Developer Intern at Ocean Young Guards, where I built an organization profile website, an admin dashboard, and a volunteer registration system using React, Express.js, PostgreSQL, and Tailwind CSS. Also built and deployed a Next.js and Supabase wedding invitation platform and a voting application used in the campus BEM chairperson election. Eager to contribute to building reliable, user-friendly web applications as a Fullstack Developer.

Work Experience

Ocean Young Guards (Non-Governmental Organization)

Jan 2026 – Jul 2026

Fullstack Developer Intern

- Developed the organization's profile website using React and Tailwind CSS to present its programs, activities, and information to the public.
- Built an admin dashboard that allows the team to manage website content and volunteer data efficiently.
- Designed and implemented a volunteer registration system with a RESTful API using Express.js and a PostgreSQL database, covering online registration, data storage, and applicant management.
- Integrated the frontend and backend through REST APIs, tested endpoints using Postman, and managed source code with Git and GitHub.

Projects

Digital Wedding Invitation Web App

the-wedding-of-frisca-arif.vercel.app

Fullstack Developer | Next.js, TypeScript, Tailwind CSS, Supabase (PostgreSQL)

- Built and deployed a digital wedding invitation website on Vercel featuring personalized guest links, RSVP, guest wishes, and a digital envelope (cashless gift) feature.
- Developed an admin dashboard with email/password authentication to manage guests, including bulk guest import from Excel and invitation sharing via WhatsApp.
- Designed the database on Supabase (PostgreSQL) with Row-Level Security (RLS) to protect guest data, supporting two access modes: registered guests with assigned seating and general guests.

Campus Election Voting Web Application

github.com/Apiii30

Web Developer

- Developed a web-based voting application with candidate profiles, vote casting, and result tallying, used in the campus Student Executive Board (BEM) chairperson election.

HIMAMI Website | HTML, CSS, JavaScript

github.com/Apiii30

Web Developer

- Built the official website of the Informatics Management Student Association (HIMAMI) to publish the association's profile, programs, and activity information.

Organizational Experience

Informatics Management Student Association (HIMAMI) – Bandung, Indonesia

2024 – Present

Head of Communication and Information Division (KOMINFO)

- Led the division in managing the association's official Instagram account and publishing information about its activities.
- Designed visual content for the association's activities and events.
- Developed and maintained the association's official website.

Education

Politeknik Praktisi Bandung – Bandung, Indonesia

Sep 2024 – Present

Diploma (D3) in Informatics Management – Currently in 5th Semester
